In extreme case of failure of Internet connectivity, (due to any reason whatsoever may be) it is the bidder's responsibility / decision to send fax communication immediately to the **service provider**. Furnishing the price the bidder wants to bid online with a request to the service provider to upload the faxed price on line so that the service provider will upload that price on line on behalf of the Bidder. It shall be noted clearly that the concerned bidder communicating this price to service provider has to solely ensure that the fax message is received by the service provider in a readable / legible form and also the Bidder should simultaneously check up with service provider about the clear receipt of the price faxed. It shall also be clearly understood that the bidder shall be at liberty to send such fax communications of prices to be uploaded by the service provider only within the closure of Bid time and under no circumstance it shall be allowed beyond the closure of Bid time / reverse auction. It shall also be noted that the service provider should be given a reasonable required time by the bidders, to upload such prices online and if such required time is not available at the disposal of the Service provider at the time of receipt of the fax message from the bidders, the service provider will not be uploading the prices and either MFL or the service provider are not responsible for this unforeseen circumstances. In order to ward-off such contingent situation bidders are requested to make all the necessary arrangements / alternatives such as back – up power service whatever required so that they are able to circumvent such situation and still be able to participate in the reverse auction successfully. Failure of power at the premises of vendors during the Reverse auction cannot be the cause for not participating in the reverse auction. On account of this the time for the auction cannot be extended and MFL is not responsible for such eventualities. Bidding in the last minutes and seconds should be avoided in the bidders own interest.
2. The Bobtech shall arrange to train your nominated person (s), without any cost to you. They shall also explain you, all the Rules related to the Reverse Auction / Auction Rules Document to be adopted along with bid manual. You are required to give your compliance on it before start of bid process.
3. The opening price shall be the **lowest price of sealed bids** and the bid decrement shall be available to the bidders before 05 minutes of the start of the auction and same shall be displayed on the site.

The start bid price and the decrement value for the Reverse Auction will be communicated by MFL through email to the Bobtech before the start of Reverse Auction. In the event of the Bobtech uploading the Start Bid price and decrement value wrongly (other than indicated by MFL through mail) due to human error or due to any other reason, MFL reserves the right to withdraw such wrongly uploaded Start bid price and decrement value and upload again the correct start bid price and decrement value and continue the Reverse Auction with that Start bid price and decrement value. Till such time the correct Start bid price and decrement value uploaded and seen by the participants, the Reverse Auction is set to be under hold and the participants are to wait till it is restarted.

4. The technical & commercial terms are as per our NIT.

5. At the end of the reverse auction if required by MFL, bidder has to provide a detail break up for his lowest offer.

III Procedure of Reverse Auctioning:

1. Reverse Auction will be conducted with IOP (Initial Opening Price) at the lowest total rate quoted in the price bid.
2. The bid decrement value will be 0.1% of IOP.
3. MFL will declare its Opening Price (OP), which shall be visible to the all vendors during the start of the reverse Auction. The bidder will be required to start bidding after announcement of Opening Price and decrement amount.
4. The bidder who quoted the lowest total amount in Reverse Auction shall be treated as final L1 Party (L1 Party after Reverse Auction).
5. The ratio of Total Amount (Total of all the items initially displayed in the BOQ by MFL) and the Final Total Amount (quoted by the R1 vendor in the Reverse Auction) will be proportionately applied on all the items.
6. The reverse auction will be treated as closed only when the bidding process gets closed in all respects for the item listed in the tender.
7. If no bid is received within the specified time, MFL, at its discretion, may decide to revise Opening price / scrap the reverse auction process / proceed with conventional mode of tendering.
8. Tenderer bid will be taken as an offer to service. Bids once made by the tenderer, cannot be cancelled / withdrawn and tenderer shall be bound to provide service as mentioned above at final bid price. Should the tenderer back out and not provided the service as per the rates quoted, MFL shall take action as appropriate.
